Index to Volume 13

1976

A

Accurate measurement of lecithin and sphingomyelin after ultra-rapid chromatographic separation, 379
Accurate method for the determination of inorganic phosphate in serum, 306
ALBERTI, K. G. M. M.: *See* KIPPS, ANN E., *et al.*
Amniotic fluid, determination of bilirubin, 510
Amylase, serum elevated levels, screening test, 361
Antigens, tumour, associated with experimental animal and human tumours, 488
Assay of parathyroid hormone in human serum and its uses, 549
Assay of vitamin D and its metabolites, 571
ATKINS, D., and MARTIN, T. J.: Metabolism of vitamin D, 561

B

BALDWIN, R. W., and PRICE, M. R.: Nature and expression of tumour antigens associated with experimental animal and human tumours, 488
Bilirubin in amniotic fluid, determination, 510
BILLIMORIA, J. D., ISAACS, A. J., and MELKI, KATE L.: A lipid and lipoprotein profile of treated and untreated diabetics, 315
BILLIMORIA, J. D.: *See* MADDOCK, CLAIRE, and BILLIMORIA, J. D.
Biochemical monitoring of cancer, 283
Biochemistry of cancer—symposium, 1975, 457
Bisalbuminaemia in central European family, 369
Body fluids, measurement of ionised calcium in, 540
BOLD, A. M.: How to pass examinations, a personal view on good technique in clinical biochemistry examinations, 399
BOOK REVIEWS:

BROOKES, P.: Chemical carcinogenesis, 471
BULBROOK, R. D.: Clinical chemistry and breast cancer, 503

C

Calcium, clinical chemistry, current concepts. Symposium, 517
Calcium, ionised in body fluids, measurement, 540
Calcium, metabolism, regulation, 518
Calcium, plasma, levels in pregnant Asian women, 339
Cancer, biochemical monitoring, 283
Cancer, biochemistry of, Symposium, 457
Cancer of breast, clinical chemistry, 503
Cancer, nature of, 467
Cancer, viruses and nucleic acids, 472
Carcinogenesis, chemical, 471
CARTER, P. M., and LACEY, B. W.: Specific aspects of immunoglobulins in relation to malignant disease, 480
CASHMORE, G. C., FEW, J. D., and FOWLES, CHRISTINE H.: Reliability of plasma cortisol determination by a simple competitive protein binding method, 371
Catecholamine-secreting tumours and their clinical chemistry, 507
Cellular immunology, 485
"CentrifiChem" Parallel Fast Analyser, evaluation, 384
CERIOTTI, G.: A new look at the measurement and interpretation of enzyme levels, 345
CHALLAND, G. S., SPENCER, CAROLE A., and RATCLIFFE, J. G.: Observations on the automated calculations of radioimmunoassay results, 354
CHAMBERS, R. E., and JONES, K.: Comparison of a gas chromatographic and colorimetric method for the determination of plasma paracetamol, 433
Chemical carcinogenesis, 471
Chromatography, high pressure liquid in clinical chemistry, a review, 409
Chromatography, two-dimensional, of urinary tetrazolium-reacting steroids, 454
Clinical chemistry of calcium, current concepts, Symposium, 517
Clinical chemistry and breast cancer, 503
Comparison of a gas chromatographic and colorimetric method for the determination of plasma paracetamol, 433

Continuous flow kinetics, factors influencing, using serum calcium estimation as a model, 438
Cooper, E. H.: The nature of cancer, 467
Cooper, E. H.: *See* Munro Neville, A., and Cooper, E. H.
Cortisol, determination in plasma, reliability of a simple protein-binding method, 371
Creatinine clearances, nomogram from results in S.I. units, 370
Crowley, Mary F.: *See* Garbien, Katherine, *et al.*
Cusick, C. F.: Accurate measurement of lecithin and sphingomyelin after ultra-rapid chromatographic separation, 379

D

Dale, R. A.: *See* Polanska, Nina, *et al.*
Determination of bilirubin in amniotic fluid, 510
Diabetics, treated and untreated, lipid and lipoprotein profile, 315
Disc electrophoresis, polyacrylamide gel, separation and relative quantitation of lipoproteins, 313
Dixon, P. F., Stoll, M. S., and Lim, C. K.: High pressure liquid chromatography in clinical chemistry, 409
Donhoffer, Hilda, Ludany, Andrea, Kellermayer, M., and Jobst, K.: Bisalbuminaemia in a central European family, 369

E

Ectopic hormone syndromes, 509
Ellis, G.: Quality control of serum alkaline phosphatase assays, project report and discussion of some factors affecting the assay, 327
Enzyme assays, new look at measurement and interpretation, 345
Erythrocuprein, superoxide dismutase, and free radicals in clinical chemistry, 393
Evaluation of "CentrifiChem" Parallel Fast Analyser, 384
Evaluation of serum/plasma separator, suitability of samples for radioimmunoassay and competitive protein-binding techniques, 449
Examinations in clinical biochemistry, a personal view on good technique, 399
Exton-Smith, A. N.: *See* Stamp, T. C. B., *et al.*

F

Field, E. J.: The immunological diagnosis of human malignant disease, 495
Few, J. D.: *See* Cashmore, G. C., *et al.*
Fowles, Christine H.: *See* Cashmore, G. C., *et al.*

G

Garbien, Katherine J. T., Tuttlebee, J. W., and Crowley, Mary F.: Evaluation of a serum/plasma separator, suitability of samples for radioimmunoassay and competitive protein-binding techniques, 449
Gutteridge, J. M. C.: Superoxide dismutase (erythrocuprein) and free radicals in clinical chemistry, 393

H

Haddad, J. G.: *See* Stamp, T. C. B., *et al.*
Hall, C. J.: *See* Smith, P., and Hall, C. J.
Hall, R.: Ectopic hormone syndromes, 509
Harnden, D. G.: Viruses, nucleic acids and cancer, 472
Heath, D. A.: Hypercalcaemia and malignancy, 555
Henry, P., and Saunders, R. A.: An evaluation of the "CentrifiChem" Parallel Fast Analyser, 384
Henry, P.: A nomogram for creatinine clearances from results in S.I. units, 370
High pressure liquid chromatography in clinical chemistry, a review, 409
Hypercalcaemia and malignancy, 555
Hypocalcaemia, differential diagnosis and investigation, 578
How to pass examinations, a personal view on good technique in clinical biochemistry examinations, 399

I

Immunoglobulins in malignant disease, specific aspects, 480
Immunological diagnosis of human malignant disease, 495
Immunology, cellular, 485
Isaacs, A. J.: *See* Billimoria, J. D., *et al.*

J

Jobst, K.: *See* Donhoffer, Hilda, *et al.*
Jones, K.: *See* Chambers, R. E., and Jones, K.

K

Kellermayer, M.: *See* Donhoffer, Hilda, *et al.*
Kipps, Ann E., Whitehead, P. H., Alberti, K. G. M. M., and Weeks, B. F.: A potential screening test for elevated amylase levels, a preliminary communication, 361

L

Lacey, B. W.: *See* Carter, P. M and Lacey, B. W.
Latner, A. L.: Wellcome award cture, 458
Lecithin and sphingomyelin, ate measurement after ultrarapid chromatographic separation, 379
Lim, C. K.: *See* Dixon, P. F., *et al.*
Lipid and lipoprotein profile of treated and untreated diabetics, 315
Lipoproteins, separation and relative quantitation by polyacrylamide gel disc electrophoresis, 313
Longlands, M. G.: *See* Wiener, K., *et al.*
Ludany, Andrea: *See* Donhoffer, Hilda, *et al.*

M

Maddock, Claire, and Billimoria, J. D.: Separation and relative quantitation of lipoproteins by polyacrylamide gel disc electrophoresis, 313
Malignancy and hypercalcaemia, 555
Malignant disease, human, immunlogical diagnosis, 495
Malignant disease, specific aspects of immunoglobulins, 480
Martin, T. J.: *See* Atkins, D., and Martin, T. J.
Measurement of ionised calcium in body fluids, 540
Melki, Kate: *See* Billimoria, J. D., *et al.*
Metabolism of vitamin D, 561
Munro Neville, A., and Cooper, E. H.: Biochemical monitoring of cancer, 283

N

Nature and expression of tumour antigens associated with experimental animal and human tumours, 488

Nature of Cancer, 467
New look at the measurement and interpretation of enzyme assays, 345
Nomogram for creatinine clearances from results in S.I. units, 370

O

Observations on the automated calculations of radioimmunoassay results, 354
Oestrogens, urinary, in pregnancy, some ionic and dilution effects in the measurement, 322
OWEN, J. J. T.: Cellular immunology, 485
Oxyphenbutazone, interference in paracetamol estimation, 452

P

Paracetamol estimation, interference by oxyphenbutazone, 452
Paracetamol, plasma, comparison of gas chromatographic and colorimetric methods, 433
Paracetamol, plasma, rapid determination, 435
Parathyroid hormone, in human serum, assay and uses, 549
PATERSON, C. R.: Hypocalcaemia, differential diagnosis and investigation, 578
Phosphatase, alkaline, serum, some factors affecting the assay, 327
Phosphate, inorganic, serum, accurate method for determination, 306
PICKUP, J. F.: An accurate method for the determination of inorganic phosphate in serum, 306
Plasma calcium levels in pregnant Asian women, 339
Plasma cortisol determination, reliability of simple competitive protein-binding method, 371
Plasma paracetamol, comparison of gas chromatographic and colorimetric methods, 433
Plasma paracetamol, rapid determination, 435
POLANSKA, NINA, DALE, R. A., and WILLS, M. R.: Plasma calcium levels in pregnant Asian women, 339
Potential screening test for serum amylase levels, preliminary communication, 361
Pregnancy, Asian women, plasma calcium levels, 339
Pregnancy, urinary oestrogens, some ionic and dilution effects in measurement, 322
Preparation of ^{125}I-thyroxine and ^{125} triiodothyronine of high specific activity for the radioimmunoassay of serum total T4 and T3, 364
PRICE, M. R.: *See* BALDWIN, R. W., and PRICE, M. R.
PUXLEY, HILARY J.: *See* THURLOW, VANESSA R., and PUXLEY, HILARY J.

Q

Quality control of serum alkaline phosphatase assays, project report and discussion of some factors affecting the assay, 327

R

Radioimmunoassay of serum T4 and T3, preparation of ^{125}I-thyroxine and ^{125}I-triiodothyronine of high specific activity, 364
Radioimmunoassay results, observations on the automated calculations, 354
Rapid determination of plasma paracetamol, 435
RATCLIFFE, J. G.: *See* CHALLAND, G. S., *et al.*
Regulation of calcium metabolism, 518
Reliability of plasma cortisol determination by a simple competitive protein-binding method, 371
REUBEN, A.: *See* STAMP, T. C. B., *et al.*
Review. High pressure liquid chromatography in clinical chemistry, 409
ROBERTSON, W. G.: Measurement of ionised calcium in body fluids, 540
RUSSELL, R. G. G.: Regulation of calcium metabolism, 518

S

SANDLER, M.: Catecholamine-secreting tumours and their clinical chemistry, 507
SAUNDERS, R. A.: *See* HENRY, P., and SAUNDERS, R. A.
Separation and relative quantitation of lipoproteins by polyacrylamide gel disc electrophoresis, 313
Separator, serum/plasma, evaluation of suitability of samples for radioimmunoassay and competitive protein-binding techniques, 449
Serum alkaline phosphatase, some factors affecting the assay, 327
Serum amylase, elevated levels, potential screening test, 361
Serum parathyroid hormone—assay and uses, 549
Serum phosphate, inorganic, accurate method for determination, 306
Serum total T4 and T3, preparation of high specific activity ^{125}thyroxine and ^{125}triiodothyronine for radioimmunoassay, 364
SHORT REPORTS:
Interference by oxyphenbutazone in paracetamol estimation, 452
Two-dimensional chromatography of urinary tetrazolium-reacting steroids, 454
SIMKINS, A., and WORTH, H. G. J.: Some ionic and dilution effects in the measurement of urinary oestrogens in pregnancy, 322
